Description

The FERRETTI 1000 flybridge yacht is defined as a true Ferretti motor yacht, built on a planing GRP hull with GRP + carbon fiber superstructure, she boasts naval architecture by the Ferretti Engineering Department, exterior design by Filippo Salvetti and a lavish interior design by ideaeITALIA Studio.

The yacht on offer for sale, is definitely a great opportunity to purchase Hull 10 of the new and highly successful FERRETTI 1000 series without the wait. This 'almost-new' yacht boasts a dynamic silhouette defined by sophisticated profile lines that impart a strong, elegant look and expansive windows that fill all guest areas with natural light.

This FERRETTI 1000 is powered by the larger twin 2638 Hp MTU engines and reaches top speeds of 28 knots, while comfortably cruising at 24 knots. Zero speed stabiliser fins insure stability both underway and at anchor.

Her outdoor spaces boast an impressive array of features. The beach area is a place of adventure and fun, while the fully equipped fly-bridge with direct access to the bow area, ensures total privacy for the guests.

The innovative and practical aft beach area provides easy access to the sea, and the spacious 55 m2 flybridge offers guests wonderful views and the chance to soak up the sun and enjoy the starry nights. It's connected to an extensive bow seating area, ideal for catching sunsets.

Beautiful contemporary interior design is a benchmark of Ferretti's pedigree build. The yacht's 5 en-suite cabins include an on-deck full-beam forward Master suite, and all the interior spaces offer great versatility, enabling Owners to create an experience tailored to their lifestyle and preferences. Below deck, you can find 2 double guest cabins, and 2 twin cabins with sliding beds so they're convertible into doubles, all with en-suite bathrooms. In total, she sleeps 10 guests in 5 en-suite staterooms, with further accommodation for a crew of 5 in 3 cabins.

The yacht is equipped with the integrated Loop system from Naviop-Simrad with touchscreen displays, which controls the main propulsion, navigation, monitoring and home automation functions using the same interface, simplifying yacht management and navigation.

Loaded with more than 1.8 million euros of optional equipment and upgrades including Malta charter compliance bow & stern thrusters double 35 kW generators, double water makers, an Ernesto Meda designer galley, Williams 445 jet tender (amongst others), this FERRETTI 1000 is an excellent example of high build quality paired with forward-thinking design resulting in stunning performance.

Early viewings and offers are highly encouraged.
