Description

The FALCON 102' motor-yacht is a raised pilothouse luxury yacht having an overall length of 31.50m and a beam of 6.50m. The classic lines are revised and updated thanks to the new window shape that makes the outline of this Falcon unique on any sea.

This is the VERY LAST hull available of the highly successful FALCON 102 flybridge model. A great value for a truly unique deal is proposed on this last hull.

The outside areas allow a varied life in the open space: the aft deck cockpit can be easily changed from an entertainment area into a proper dining room outdoor. The same is for the sitting area on the flying bridge, equipped with built-in fridge and ice-maker, sink and barbecue, offering a perfect space for informal dinner. There are two sunbathing areas as well: the sunbed on the flying bridge and the built-in area on the forward deckhouse with access from the main deck via a few steps.

The saloon is structured as a large "open space" to be fitted out according to the Owner's needs and tastes: the division into entertainment/conversation and dining area, the choice of woods, decoration elements, furniture design and finishing are studied and defined together with our clients to offer them a unique and customized ambiance down to the last detail.

The dining area gives the guests opportunity to stay gather round the large table. The wide and well-equipped galley on the main deck is communicating with crew area situated on the fore lower deck and made up a crew mess and three en-suite cabins which can accommodate five people.

The sleeping area consists of an Owner's cabin on the main deck and four double cabins on the lower deck. All cabins can be furnished with any kind of luxury, TVs connected to the satellite antenna, the hi-fi system and elegant private bathrooms finished in precious marble. Guest relaxation and sleeping is guarded by efficient soundproofing and insulation.

The competitive performances are granted by 4000 Hp, released by two diesel marine engines MAN V12-2000 for a maximum speed of 27 knots and cruising speed of 24 knots. The engines are positioned in a large engine room in the aft area communicating with the lazarette where the generators, the main electric panel and installations are located.

There are two steering positions: the main one is situated in the large raised pilothouse, offering excellent work space combined with the finest instrumentation to make navigation safe and secure. The second steering position is on the flying bridge, also equipped with comprehensive electronics allowing to navigate the vessel independently.

For enhanced comfort while cruising and at anchor, this FALCON 102 features an electric zero speed fin stabilizer system.

Viewings are encouraged in Tuscany.
